son. The Orbita is the first Royal Mail liner to leave here for Cherbourg, Southampton and Hamburg.

The line has the distinction of being one of the oldest of British steamship rganizations as well as one of the largest. Since its foundation in 1839, by royal charter from Queen Victoria, the company has witnessed every stage of steamship development from salls, pad-dle wheels and screws down to the pres-

dle wheels and screws down to the present oil burning turbine liners.

The R. M. S. P.'s new Atlantic service, which will be known as the "O"
Line, includes at present three 15,000 ten steamers, the Orbits, Orduna and Oropesa, on which the company's high standard of luxury will be maintained in the matter of culsine and the appointments of the public rooms and staterooms. These vessels will run fortnightly between New York and European ports urtil the beginning of next year, when a weekly service will be laugurated and several large oil burning, turbine liners will be added to the fleet.

Recognizing the importance of Amer-

will be added to the fleet.

Recognizing the importance of American trade, the Royal Mail Company is planning to spend millions of dollars in developing new services on this side of the Atlantic. One of these is a freight service which has just been started between Vancouver, Seattle and United Kingdom ports in cooperation with the Kingdom ports, in cooperation with the Holland-America Line. Special refriger ator steamers will be employed in this
